GIVEN BY
Charles W. Folsom.

outside - I am making maps of
Texas just now & doing a little
civil work for Capt. Davis. He ^{is} ~~is~~
once a civil Engineer & Architect, and

March 4, 77

in the Army & superintending the construction
of the D.M. Depot here - which by the
way is a big thing - a stone wall 24'
high, sheds, surrounding 3 sides part
of a fourth of a square of about 9 acres
(624' on side) ^{the rest} part of the 4 side
is occupied by what is called the
"Administration building" (Office) 2
stories high, & a part of 2 sides or there,
by App. & C.S. store rooms. The west
sheds sheds &c. In the center of the
square a tower 15' square & 90 ft high
with a watchman's room & water
tank on top. All this work
beautifully situated on a noble
broad eminence overlooking all
the County about 2 miles from
the heart of the city - ^{m.g.m.} (designed it)

I really haven't had time to examine
the plans except very hastily & cursory
W.H. Owen

At least I remembered to have
read at one time that such
a survey was making or in Contain-
flation & I had felt the idea that it
had been made. If so the War Dept.
would of course have a very elaborate
map to fit - That was what I was
after & I supposed if such a survey
had been made, you would know all
about it. Your Roxbury map gives me
a very good general idea of topography &
will be useful -

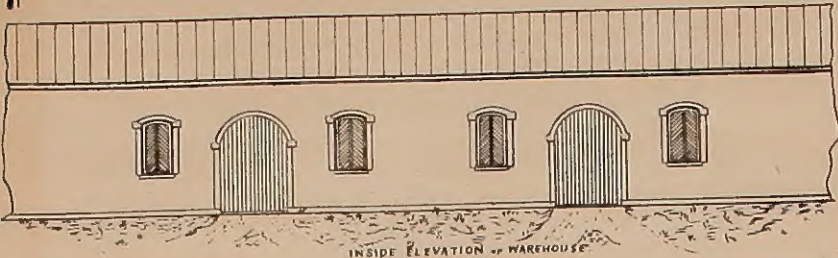

The survey I thought I might have
to make here is a small affair of a
few acres 10 or 20 I believe, & I don't
know that I shall be called upon for
all. I have heard something about
Gen. Perry's employing ^{and} ~~an~~ engineer
formerly in the office has to do the job.
Probably out of pity for his poverty. He
that cuts me out of a month or two
very pleasant work & keeps me in the
office when I would much rather be
